

# Heat up your water

and cool down your electric bill

## More efficient

A heat pump water heater is two times more energy efficient than conventional electric water heaters.

## Save money

Heat pump water heaters have lower operating costs. An average household can save \$200 per year on its electric bills compared to a standard electric water heater.

## Tax credit

Take advantage of the heat pump water heater federal tax credit of 30 percent of the cost (including installation/labor costs), up to a total of \$1,500. For more information, visit [energystar.gov/taxcredits](http://energystar.gov/taxcredits), or consult a tax advisor.

## PSE rebate

PSE residential electric customers can apply for a \$250 rebate on an ENERGY STAR qualified heat pump water heater. Visit [PSE.com/ForYourHome](http://PSE.com/ForYourHome) for a complete list of qualifications.

PSE has made no implied or express warranties or representation with regard to these products or energy savings from their installation.

If your home heats water with electricity, Puget Sound Energy will give you a **\$250 rebate** to enjoy your hot showers even more by installing an ENERGY STAR® qualified **heat pump water heater**

## What is a heat pump water heater?

A heat pump water heater uses electricity to move heat from one place to another, instead of generating heat directly. It absorbs heat from the surrounding air and concentrates it in the water tank. Think of it as a refrigerator in reverse.

## Limited time offer

For more information and to learn if you are eligible for the PSE heat pump water heater rebate, contact this qualified contractor.
